FOREWORD

The National Bureau of Plant Genetic Resource (NBPGR), established by the Indian Council of Agricultural Research (ICAR) in 1976 and located at New Delhi, is the National Institute for all the activities pertaining to exploration, acquisition, evaluation, conservation and documentation of Plant Genetic Resources. Its activities are service oriented with primary aim to supply the plant germplasm to various researchers and plant breeders. It is the nodal agency for germplasm collection and as per the need of the country to procure the potential genetic material; systematic efforts have been and are being made to collect the valuable germplasm from different agro-ecological regions.

Division of Plant Exploration and Germplasm Collection (PEGCD) plays a vital role in enriching the national holdings through execution of regular surveys and explorations in order to assemble the new germplasm from various parts of the country. Keeping in view the species wise status of present collections in the gene bank and also the specific requirement of the country, the crop specific and multi-crop explorations are planned and executed in collaborative mode with ICAR crop based institutes, SAUs, KVKs and other stakeholders.

For efficient management of germplasm as well as to plan and execute the further collection missions, proper documentation of passport information of indigenous collections is essential. The passport information of all the indigenous collection is serially registered and the collected material is assigned with the national identifier (accession) number namely indigenous collection (IC). For proper utilization of the collected germplasm by the breeders and other users, it is essential to enquire about what material have already been collected from which area and where that may be available. To fulfill this need, PEGCD have started annual compilation of passport information in the form of ***Plant Germplasm Reporter: Indigenous Collections***. I am happy to bring this issue of the year 2018 to user scientists and hope that the information under circulation will prove its usefulness for them. The views and suggestions to improve this service are welcomed.

Summary

In the year 2018, a total of 34 explorations (involving 23 collaborators) were undertaken across the country wherein 3,287 accessions of various agri-horticultural crops comprising 2,542 accessions of cultivated and 745 of wild species including crop wild relatives (23%) were collected from 24 states (109 districts). Of these, 1,538 accessions were collected by ICAR-NBPGR Headquarters, New Delhi through 16 explorations. The states include Andaman & Nicobar Islands, Andhra Pradesh, Arunachal Pradesh, Assam, Bihar, Chandigarh, Goa, Gujarat, Haryana, Himachal Pradesh, Jammu & Kashmir, Karnataka, Madhya Pradesh, Manipur, Maharashtra, Meghalaya, Mizoram, Odisha, Punjab, Rajasthan, Telangana, Tripura, Uttarakhand and Uttar Pradesh (Table 1 & 2). Emphasis was mainly given on collecting germplasm from various diversity-rich, remote/ tribal inhabited and disturbed under-explored areas, namely Dhubri, Kokrajhar and Chirang (Assam), South West and West Garo Hills (Meghalaya), Churachandpur and Pherzawl (Manipur), Upper Siang (Arunachal Pradesh), Saiha, Lawngtlai and Lunglei (Mizoram), South Tripura and Dhalai (Tripura). Cold tolerant wheat from Uttarakhand; wild relatives of wheat & barley from cold desert of J&K & Himachal; *Tubocapsicum anomalum* -An unreported species from Arunachal; wild okra from foot hills of UP & Uttarakhand were some notable collections. In addition, a total of 690 herbarium specimens (including 84 unrepresented taxa) were also processed and added to the National Herbarium of Cultivated Plants (NHCP), New Delhi.

Disclaimer: The IC numbers have been assigned as per procedure of National Genebank. However, accessions with less seed quantity or as vegetative material are multiplied at suitable sites, while the vegetative material are being processed for alternative methods of storage (Field genebank or Tissue culture facility). The IC numbers to such material would be assigned after completion of required procedures.

Variability in Agricultural and Horticultural crops

		
<p>Variability in panicles of foxtail millet from S.W.Garo hills, Meghalaya</p>	<p>Variability in panicles of paddy from S.W.Garo hills, Meghalaya</p>	<p>Variability in wheat from Madhya Pradesh</p>
		
<p>Tibetan purple barley with green awns from Leh (J&K)</p>	<p>Variability in ear heads of barley from Pithoragarh, Uttarakhand</p>	<p>wild <i>Abelmoschus manihot</i> ssp. <i>tetraphyllus</i> under cultivation in Saharanpur, UP</p>

Institute Names and Their Full Form

IIHR	Indian Institute of Horticultural Research (Bengaluru)
CRRI	Central Rice Research Institute (Cuttack)
OUAT	Odisha University of Agriculture and Technology (Orissa)
VPKAS	Vivekananda Parvatiya Krishi Anusandhan Sansthan (Almora)
DOGR	Directorate of Onion and Garlic Research (Pune, Maharashtra)
IARI	Indian Agricultural Research Institute (New Delhi)
DRR	Directorate of Rice Research (Hyderabad)
IIVR	ICAR- Indian Institute of Vegetable Research, Regional Research Station, Sargatia, Kushinagar
BSKKV	Dr. Balasaheb Sawant Konkan Krishi Vidyapeeth, Regional Fruit Research Station, Vengurla, Maharashtra
CITH	ICAR-Central Institute of Temperate Horticulture, Srinagar and its Regional Station, Mukteshwar
PAU	Punjab Agricultural University in Ludhiana, Punjab
BAU	Birsa Agricultural University Kanke, Ranchi – 834006. Jharkhand
Dr. YSR	Dr.Y.S.R. Horticultural University Hydrabad
GKVK	Gandhi Krishi Vigana Kendra (GKVK) Bangalore
KAU	Kerala Agricultural University (KAU), Thrissur, Kerala
KU	Kumaun University,. Nainital,. Uttarakhand
IIHR-CHES	Central Horticultural Experiment Station, Aiginia, Bhubaneswar
CRIJAF	Central Research Institute For Jute and Allied Fibres (CRIJAF) Barrackpore Kolkata
CCSHAU	Chaudhary Charan Singh Haryana Agricultural University, Hisar (Haryana)
